

DIY Clock with Movable Hands Kit

Assembly Instructions:

1. Print this page on cardstock for best results (regular paper also works)
2. Carefully cut out the clock face along the outer circle
3. Cut out the hour hand (shorter, thicker)
4. Cut out the minute hand (longer, thinner)
5. Use a hole punch or sharp pencil to make holes at the marked centers
6. Stack the hands: minute hand on top, hour hand below
7. Push a brass fastener through both hands and the clock center
8. Bend the fastener legs on the back - not too tight, hands should move freely
9. Your working clock is ready to use!

Materials Needed: Scissors, Brass fastener (paper brad), Optional: Hole punch, Cardstock paper

Clock Face

Cut along the outer circle. Punch hole at center dot.

Hour Hand (Short)

Cut out carefully.
Punch hole at bottom.

Minute Hand (Long)

Cut out carefully.
Punch hole at bottom.

Tip: Color the hands different colors before cutting (blue for hour, red for minute) to help students distinguish them!
